A STRONGER
TOMORROW

WHO WE ARE

We Are Arselor.

A Saudi business technology company
that takes ownership of the IT behind
your operations.

Technology should make business easier.

Arselor (ARC Business
Information Technology Est.)
was founded in 2016 to help
organizations run, secure and
improve their technology with
one accountable partner.

We do not start with products.
We start with your business.

Local Context

Saudi-based, serving business
customers with an understanding
of local requirements and
operating realities.

Business-First

We translate technical decisions
into business impact: continuity,
productivity, risk and growth.

One Accountable Partner

ERP, cloud, security, infrastructure
and support can be coordinated
through one team.

What We Help You Achieve

One connected operating system

Better visibility and reporting

Fewer manual steps and duplicate work

A platform that can scale with the business

Typical Scope

- **Requirements & process discovery**
Understand the business first, then design the system.
- **Deployment & configuration**
Set up the right modules, workflows, access and company structure.
- **Data migration & integrations**
Move critical data and connect required systems.
- **Saudi e-invoicing / ZATCA readiness**
Support compliant invoicing and relevant integration requirements.
- **Customization, training & support**
Tailor where necessary, enable users and sustain the system after go-live.

No generic implementation: the solution should reflect how your company actually works.

CYBERSECURITY & COMPLIANCE

Protect the business. Prove the controls.

Security is strongest when technology, governance and evidence work together.

PREVENT
DETECT
RESPOND
COMPLY

CCC / CCC+ Support

Gap review, documentation readiness, technical evidence and audit preparation for applicable Saudi Aramco supply-chain requirements.

Endpoint & Email Security

Protect users, devices and communication channels against common business threats.

Firewall & Network Security

Secure internet access, segmentation, firewall configuration and network protection.

Governance & Security Improvements

Policies, controls, access reviews and practical remediation priorities.

Security Ecosystem

kaspersky

SOPHOS

FORTINET

W / T H[®]
secure

The objective is not a checklist. It is a defensible security posture that supports your business and applicable requirements.

Cloud Solutions

Microsoft 365, Azure & Managed Cloud

Make collaboration secure, manageable and ready to scale.

One tenant. Clear governance. Better day-to-day experience.

Microsoft 365

Licensing, deployment and administration for Exchange Online, Teams, SharePoint and business collaboration.

Migration & Tenant Transition

Plan and execute email, user and service migrations with controlled cutover and validation.

Azure & Cloud Infrastructure

Cloud infrastructure, migration, hosting and operational support for business workloads.

Identity & Security Hardening

Improve access controls, authentication, configuration and security posture.

Managed Support

Ongoing administration, troubleshooting, optimization and user support.

People work securely from anywhere • centrally managed collaboration • clearer cloud ownership

An IT Team Behind Your Business.

Responsive support for users, devices, networks and servers — with clear ownership from issue to resolution.

**Faster
Resolution**

**Clear
Ownership**

**Proactive
Care**

Managed IT Support / AMC

Ongoing support for users, devices, software and business-critical IT.

Infrastructure Operations

Servers, workstations, networks, firewalls, Wi-Fi and related infrastructure.

Monitoring & Lifecycle Care

Recurring issues, asset health, capacity and technology replacement planning.

Request

Diagnose

Resolve

Prevent

Support that improves the environment — not just the ticket.

BACKUP, HOSTING & CONTINUITY

Keep Operations Available When Something Goes Wrong.

Backup is only useful when recovery is understood, monitored and aligned with what the business actually needs.

BUSINESS
CONTINUITY
BUILDS
CONFIDENCE

Acronis

Backup & Cyber Protection

Protect critical business data
and improve recovery
readiness.

Managed Servers & Hosting

Managed infrastructure, web
hosting, server operations and
proactive monitoring.

Recovery Readiness

Design recovery priorities and
validate that critical data can
be restored when needed.

Monitoring & Verification

Monitor capacity, services and
backup health instead of
discovering issues during
an outage.

Business Value

Faster
recovery

Lower
downtime risk

Stronger
data protection

Resilient businesses are prepared.

We help you build, monitor and maintain the backup and hosting
foundation your business depends on.

Why Customers Keep Arselor Involved.

Because the value is not only in the technology — it is in how the solution is selected, delivered, supported and improved.

Saudi market context

Local understanding helps technology decisions fit business reality, compliance expectations and customer requirements.

One accountable partner

Reduce fragmentation across ERP, cloud, cybersecurity, infrastructure and support.

Business-first recommendations

Start from the operational need, then select the technology that fits.

Multi-vendor capability

Work across leading platforms instead of forcing every requirement into one product stack.

Project + ongoing support

Delivery does not end at installation; support, administration and improvement continue.

Long-term continuity

Build systems that can be maintained, expanded and understood as the business evolves.
